Sandira Sudamsith

Software Engineer Intern

Panadura, Sri Lanka | sudamsiths@gmail.com | +94 72 215 1182 | LinkedIn | GitHub

About Me

Full-stack developer specializing in Java/Spring Boot backends and React/Next.js frontends, with hands-on internship experience building production-grade applications. Proficient in designing REST APIs, integrating third-party services, and writing clean, maintainable code. Experienced in Agile team environments with strong foundations in OOP, design patterns, and modern software architectures. Passionate about solving real-world problems and continuously expanding technical skills.

Experience

Intern Software Engineer, SimpliFy Labs (LK) — Sep 2025 – Mar 2026

- Collaborated with a development team to build and ship a real-world production application — Ceygo PWA (live)
- Built the company website using Next.js
- Contributing as a Full-Stack Developer using React (Frontend) and Spring Boot (Backend) with MySQL
- Involved in API integration & testing, QA, Test case writing and UI design
- Applied OOP principles and clean code practices throughout development
- Demonstrated strong teamwork, problem-solving, and adaptability in a fast-paced environment

Education

University of Moratuwa, BIT Undergraduate — Starting 2025

iCET Institute of Computer Engineering Technology, ICD Developer Programme — Nov 2024 – Present

- Currently enrolled, developing expertise in enterprise and standalone application development with Java and Spring Boot
- Building strong foundations in OOP, design patterns, and modern software architectures

G.C.E. Advanced Level, Completed 2023 — 2024

Certifications

Crash Course: AWS Basics – KodeKloud — Certificate

Tech Stack

Languages: Java, JavaScript, TypeScript, Python, HTML, Go, C# (Learning), PHP (Learning)

Frameworks & Libraries: Spring Boot, React, Next.js, JavaFX, JPA, Hibernate, JWT (Learning), Tailwind CSS, Bootstrap

Database: SQL, MySQL, MongoDB (Learning)

DevOps & Cloud: Docker (Learning), AWS (Learning), CI/CD (Learning)

Tools: IntelliJ IDEA, VS Code, PyCharm, Git/GitHub, Figma, Postman, Swagger, MySQL Workbench, HeidiSQL

Soft Skills: Problem Solving, Team Collaboration, Quick Learning, Adaptability

Projects

E-Waste Management System • *Completed – 2025* GitHub GitHub

- Developing an end-to-end web application for managing electronic waste with microservice architecture and MySQL database
- Features: parcel tracking, branch management, delivery system
- Technologies: React (Frontend), Spring Boot (Backend)

Clothing Store LK • *In Progress* • *Group Project (Team of 3)* GitHub GitHub

- Full-stack clothing store web application built collaboratively with a team of 3
- Frontend: Next.js, TypeScript, Tailwind CSS and modern UI libraries
- Backend: Spring Boot, Spring Security, Swagger, Java, MySQL; Features: authentication, order processing

Clothify Store POS System • *Completed – 2024* GitHub

- JavaFX desktop app for clothing store management with product management, inventory tracking, sales processing, customer management, and reports
- Technologies: JavaFX, MySQL, Scene Builder, Google Guice

MOS Burger Ordering System • *Completed – 2024* GitHub GitHub

- Full-stack system for burger shop operations: menu management, order placement, customer records
- Technologies: Spring Boot (Backend), HTML/CSS/JS (Frontend), Hibernate, ORM

Crypto Portfolio Tracker • *Completed – 2025* GitHub

- Responsive dashboard for real-time crypto market analysis with AI-powered insights via Gemini API
- Technologies: HTML, Tailwind CSS, Chart.js, CoinGecko API, Gemini API
